

Northern Ireland to Scotland Bridge

Recently, there has been discussion about a potential project to build a bridge to connect Northern Ireland and Scotland.

Your task is to design a bridge that could possibly span between 21 and 28 miles, crossing the Irish Sea.

First, research different types of bridge and think about what design may suit this distance best.

Next, research some other bridges around the world that span a similar distance and cross water:

Draw your design in the box.

Don't forget to label your picture with the materials you plan to use or any design features you will include.
